

On March 1, 2024, Rodin4D, TechMed 3D and Vorum merged to become Qwadra. Qwadra represents the union of decades of expertise, cutting-edge technology and a shared commitment to revolutionizing CAD/CAM solutions for orthopedics and podiatry.

Qwadra is the leader in global CAD/CAM solutions for orthopedics.

After months of work, Qwadra is excited to write a new chapter in orthopedic innovation. Because innovating together means innovating better, Rodin4D, TechMed 3D and Vorum aim to offer the best CAD/CAM solutions for the orthopedic sector.

Today, with Qwadra, over 70 people work together with industry professionals worldwide to design tomorrow's tools and softwares.

Qwadra's teams are driven by a unique mission : to provide practitioners with the tools they need and train them in their use to provide the highest quality care to patients. From precision measurements to personalized solutions, Qwadra is at the forefront of positive change in the orthopedic landscape.

Setting new standards: a merger for superior service and product quality

With more than 70 years of combined expertise, customers in more than 85 countries, rapid response, 5 languages spoken and partners around the world, Qwadra is ready to support every professional in a human and personalized approach.

From the digital division of the Eqwal Group, Qwadra embodies inclusivity and innovation to stay ahead by designing tools that don't yet exist, pioneering solutions that reshape the landscape of possibilities through in-depth research and a dedication to understanding the human body. They are also committed to fostering a culture of inclusion, diversity and continuous improvement.

Are you ready to push the boundaries of progress in the orthopedic care sector ?
Qwadra invites you to join them in achieving this goal.
